BUILDINGS COLLAPSE

Without Warning in Wheeling, West Virginia.

A NUMBER OF PEOPLE KILLED

The Horror of the Accident Increased by a Fire Which Broke Out in the Rulus

Whereham, W. Va., April 9.—At 8.20 o'clock this morning the south wall of the four-story brisk block of Hutchinson & Co., on the corner of Main street and the alley south of Twelfth street, collapsed without warning. Next north of it was Chapman & Son, who were just a described in the street of Co. deal in hardware, saddlery, etc., and

the building was packed full of goods. The wall on the alley first fell out, pulling with it this partition wall between Hutchinson and Chapman's. The crash of the falling buildings was terrific, and soon drew thousands to the scone. The horror of the accident was increased by a fire which broke out, and as there were large quantities of oil, turpentine and like material in Chapman's, the situation was hard to meet. Four employes were cappt in the flutchinson building. They were Robert Winchester, Engene Burch, T. J. Horan and M. J. Ford.

The lirst three have not been found and are doubtless dead. Ford was recued and may recover. Charles Haller, the bookeeper, and Adam Blunkpather were pinned up against the rear wall and wrot released tunipired.

Xir. Hutchinson was in the second store and was bathy injured, but was researed nilve, and hopes are entertained that he may recover.

When the collapse came Ford was seeling goods to Benjamin Pritchard, a wagon manufacturer of Buchanan, W. Va. Pritchard's dead body was found lying across Ford's loga.

Shortly before the accident the Rev. Father H. Parke, vicar general of the Catholic diocess of Wheeling, was seen to enter the alley and was believed to kelibel, and this belief was sadly confirmed at 6.30 this evening, when his body was recovered. He was 72 years oid, a distinguished clergyman, chaptain of Mount Dechanata needenry, and had been twice administrator of the dineese. A western Union tween his messenger boy named Harry Covl., Aged 14, its sket thought to have been in the alley, but his budy has not been recovered. No others are known to be lost. There was an early report that a cap, its driver and four occupients were not been in the alley, but his budy has not been recovered. No others are known to be lost. There was not server when the best was not server in lond there in the alley, but his budy has not been recovered. No others are known to be lost. There was not server in located for blocks, ton strouns playing all day and averaging 1000 gallones a minu

ing.

Tent indignation is expressed because all the time line old Melodeon hall property was being remodeled and a story added in 1891 by Mr. Hutchinson the walls were conformed, but he persisted in using them, and owing to the lack of adequate laws could not be provented.

Washington, April 9.—The President has disposed of a case that has been has disposed of a case that has been pending for many months in acting upon the record of court mertial, held at Vancouver barracks, Wash., which sentenced Mujor Joseph W. Wham, a paymater in the army, to dispuissal for father to pay his dubts. The President mitigated the sentence to a suspension on half pay, from each dusy and all priveleges, sutil January, 1981, his name to be placed at the foot of the list in the pay department. The date mentioned is that upon which Major Wham will retire, as that he can never again see active service, and he will drop from No. 9 to No. 25 in his rank, so there will be no possibility of his own promotion, nor can he vistant the promotion of majors who cany enter the grade hereafter.

The Income Tax Decision.
Washington, April 9.—"So far as the lower courts are concerned," said Attorney General Uney, "the decision of the supreme court is as blinding as if the whole court had been unanimous in its favor. I cannot believe any judge would grant an injunction to prevent a collector from collecting the tax on incomes derived from other sources than rents or state and monicipal bonds in the face of the supreme court's action. The only way I can see by which persons who object to paying the tax can secure judicial action is by paying the tax can secure judicial action is by paying the tax can see the decision of the supreme court's consecurity of the suprementation of the suprementa The Income Tax Decision.

to Inquiry Into the Disappear-

TRIAL OF SANDERS.

Attorney Hinds Promises

New Testimony.

The rumor that fresh testimony fo Wubb's court room to be occupied ye terday, though there was never at any time of the day anything approaching to

browding.

Attornoy S. J. Hinds stated the cas for the people. He said that the real issue in the case is whether the signature of William Wootlon on the Kutner Goldstein draft was written by Wootton.

issue in the case is whether the signature of William Wootton on the Kutner-Goldstein draft was written by Wootton. If not was it written by Sanders or a third person, and did Sanders know at the time he presented the draft that it had been written by such third person? In order to come up to this point it was necessary to recount to the jury all the instea and circumstances, all the acts and conversations of the defendant in his relations with Mr. Wootton lending up to the poneral issue.

Mr. Hands continued that he proposed to show that it was the object of Sanders to possess kinsself of the real and personal property of Wootton, or as much as he could securely obtain. In order to gut possession of the real proporty it was necessary to have a written transfer, and so even with the personal property evidenced by warehous receipts, mensuance policies, etc. To get the results of the sale of those instruments, it was necessary that the name of William Wootton should be written. The relations of Sanders and Wootton provious to the latter's disappearance were touched on. Counsed said Sanders led Wootton to believe that he could find a purchaser for the ranch at a good figure. In the transections ending in the alleged sale of the ranch at a good figure, in the sum of the latter's disappearance led Wootton to believe that he could find a purchaser for the ranch at a good figure. In the transections ending in the alleged sale of the ranch at a good figure, in the latter of the property into his lands he simply created the ones mentioned. Mr. Hinds next turned his attention to the scene at the Wootton ranch on the favores mentioned wootton were seen in the former's backboard. This mentionless figure, supposed to be Wootton, eat all the will orect on the seat of the huckboard.

Oursel proceeded to state the owdones from the buckboard. The mentionless figure, supposed to be state the conditions of the conditions of the real of the find the buckboard. The mentionless figure, supposed to be wootton be denied from the buckb

names from the buckhoard. The motionless figure, supposed to be Wootton, est all the while orect on the seat of the buckhoard.

Ooursel proceeded to state the evidence from the point when Robiol saw Wootton as described, an the sent of the huckboard up to the morent of his disappearance from mortal ken. To Mr. Hinds it seemed very clear that if Wootton was with Sandore on the buckboard when they loft the huseo. Sandore was seen a little later, not a mile distant from Wootton's plane, and driving mway from it all alone. This fact would be sworn to by two new witnesses, both of whom saw Sanders in the buckboard, and were confident no one was with him at that time.

It is learned that the names of those witnesses are Wiseman and Rockard, and it is claimed that they will corroborate the testimony of Gobin, who saw Sanders driving alone.

The first witness railed to the stand was Chades Robiolf, a Garman, who had warked for Wootton for several square, As soon as Mr. Hinds began to ack him questions about Wootton's diapopearance, and the matter of Sandors' allusions to Knuusch, Mr. Short interposed an objection to any evidence lending to imply a presumption oither that Wootton's dead or that if such be the case Sanders had any knowledge of the fact at the time the draft was signed. He urged in the strongest terms that the prossention was not seeking to show the furgery in this instance, but to raise the pre-umption that Wootton is not living.

Judge Wohl overruled the objection, allowing Mr. Short the hencit of an execution to the whole of the testimony on this line.

The remainder of the day was taken up with the examination and cross-us-amination of Robloth, The principal point of his testimony was that he asw Sanders drive from the Wootton ranch on the afternoon of March let at 4 p.m. with a man whom he appeared to be Wootton, and that he never saw the latter atterward. The case will proceed to day.

The voters of Fresne have again reu-dered their verdiet at the polls, and manicipal politics will take a needed rest mancipal pointer with the continue such slight activity as may be occasioned by the changes incident to a new administration. Whatever opinion may be held in regard to the wishin expressed at the polls, it is well that it be accepted cheer polls, it is well that it is shown that it is despressed to fully, for the popular will is the supreme power under our form of government, and there is no appeal from it.

After all, good government is the main consideration, and if that is achieved

ereousl and party disappointments may well be set aside in view of the ader consideration. Certainly the strature consists and the surrounding circumstances taken into consideration, have little to complain of. Two parties were united against them, and notwithstandng this fact they secured one-half of the offices, and are in a position to prevent offices, and are in a position in the man-nay radical partisan action in the man-agement of affairs and control of patrolage. The result of the election was really a victory for Ropublicans, won against heavy odds.

The result, so far as the Populists are neerned, has occasioned no sur-ise. It was confidently believed be-te the election that they were morely would be dropped with a sickening they would be arripled with a section of the data the polls. That opinion was more than verified by the result. The Populists faithfully raked the chestnuts and were kicked with a hard, unfeeling boot for their pains. About the only consolation they are getting from any consolation they are getting and advised source is the stereotyped information that they had been told so by nearly everybody; but they at least have the newbedge which comes of experience, and notwithstanding their recent misullinnee it cannot be doubted that they animose it cannot be doubted mass that are capable of profiting by knowledge which comes in that way. The campaign and election as a whole passed of ins manner highly creditable to the people of the city, the only exceptions being alleged illegal voting, for which a substantial profit is the property of the city of t number of screets have been made. If number of arrests have been made. It refines against the ballot have been committed, as indicated by the action taken, all good citizens should units i. demanding a vigorous prosecution. It is only by punishing illegal voters that e can be made exceptional inthe crime can be made exceptional in-stead of common, as it now is in many localities. The county of Fresno owes it to itself to make this crime odious within its borders. An houest vote and a fair count should be the united de-mand of all parties, and to that end let the law breakers be punished without

FRESNO'S FROSTLESS BELT

Apparently the exercition which the farmers and fruit growers of this county enjoy from damage from late frost is no fully known and appreciated at its real value. Recent experience of this and other localities should serve to again call attention to this important advantage. For some reason not yet fully understood there is less damage by frost in this county—at least on the vast upland territory lying between the San Josquis and Kings rivers—than in any other portion of California, excepting, of course, the small valleys and coves of the foothills, where frost is practically unknown. Even in the most favored portions of the far-famed southern citrus belt, there has been far more damage from frost within a period of ten years than there has been in Fresno county. The records will prove the statement.

cent proof of the fact that Franco is in where frost is comparatively counties were so badly damaged that in some localities nothing was left. In the counties of this valley south of Freeno similar results were ex-perienced, though the damage was not meyers as in the northern counties. Freeno was untouched as far as actual was concerned. Apricots and eaches were thinned a little in early peaches were thinned a little in some places, and that was all. Last Thursday night another cold wave passed over the coast, and its effect in the adjoining county of Tulare is de-scribed by the Register as follows:

Ag far as we can ascertain, Thursday night's frost was a killer. The entire night's frost was a killer. The entire crop in many orchards over the caunty has disappeared as it by magic. It was not merely a frost. It was a freaz, for the mercury got down to 28 and remained there a number of hours, and the effects were meet dieastrous. There has not been anything like a total failure of the peach crop cince full are county was settled, and if this is a total failure, it is the first one. We have had one or two light crops, but usually the frosts have scarcely done so much as to thin crops sufficiently, but very little artificial thinlight crops, but lightly do from have scarcely done so much as to thin crops sufficiently, but very little strifficial thing will have to be done this year. The prone crop was also burt very badly, and the general outlook for fruit is, at this time, most discouraging.

any appreciable damage was done by this frost in Freezo county. Certain it is that vegetation in this city was un-touched by it, and no complaint has been heard from any outside locality. Just what causes this immunity from damag-ing frost, when other sections not more than forty miles distant suffer so severely is not fully understood, but as to its advantage and the importance of that ad-

Stockton complains because it is as yet unable to raise the \$100,000 it promised to the companing raised.

The companing raised, it still lac .ing \$40,000 of the desired sum. The writer is rominded of an incident that came to his knowledge during a recent visit to Stockton. The vity agreed to give not only \$100,000, but ground, as well, for the railroad, A certain wealthy must donated \$4000 to the fund. Then he bonded the land desired for railroad shops for \$13,000 and offered to sell it for \$41,000; finally reducing the price to \$39,000. In other words, he proposed to make \$21,000 (niter paying his subscription) out of the public spirit of other citizens of the city. Here is an example of the spirit, we prevalent in Stockton, which has given to that city the reproachful appellation of "slow Stockton." Natural advantages have forced prosperity on that burg, but it will never be what it should until it has land several elegant funerals.

desirable that the public understand its
aim and character.
The society has for its sole object the
general advancement of numeral cultures
in the community; to be stained by the
practice and subsequent public perfermance of high class music, which
otherwise would be unbeard and therefore practically unknown.
There is no connection in any way
between the society and any church,
school or other institution. It is not
intended to use the society for
the purpose of money-making for any
person or institution. The clorus now numbers over fifty
voices. During the past few weeks the
rehearsals have been well attended, and
the carnest attention to work certainly
betokens great indexest and augurs well
for a very successful society. The concert to be given at the Presbyterian
church on Friday evening, April 12th,

This was overheard by James Ward, also a Fresmoan, who has been taken by the governor into the secret service. Mr. Wurd is a friend of Major W. D. Crichton of Fresno, who looks with hungry open at the place coveted by Preser. This may not have affected the datective at all, but he is said to have given the governor information of Peeler's loosat-

governor information of Feeter's losse-ful words.

As a result Peeter was called before Mr, Budd, who announced that so long as he occupied the position of chief ex-centive of the state no man could hon-estly claim to have a "dead cinch" on any place till he had been appointed. And now Mr. Peeter is wondering what the outcome will be.

W. D. Crichton's friends have taken great encovragement from the circum-stance. They hape to see their friend get the place which seemed for a time hopelessly beyond him.

Something About the Drama Which is to Be Presented Monday.

"The Girl I Left Behind Me" is now more elaborately presented than over before. The popularity of the play is wonderful, and seems to continue to increase. The portaining engagement at the Barlon opera house, April 16th, unless all signs fail, will be the most preparent that has played here. The tend of the tendent had been authors of "The Girl I Left Behind Me" have gone neither to England nor the continuat of Europe for their characters. They have found soldiers and girls heroes and villaine, at home to suit their purpose. To make the American twang all the more pronounced, they have laid their hands upon Lo, the poor Indian, and made him really and truly he most notable novelty in the pince. The loral color is even more strongly bright out in the seenery and stage effects. There are vest, plains, the campfire of the locatile Indians, their world and terrible copy, the measured threatened parison, the swish of the rife ballets and finally the tremendant rescue. The Whole story is worked out in the Rackfoot country. Monusin, at an army post. The story is interesting all through, and the chapter of heroics, with the beaused stockade, is guardacy moving. The stockade is gountinely movity. The principal members of the cest are to him Shaumon, Gertrude Berkdey, Lot the Alter James E.
